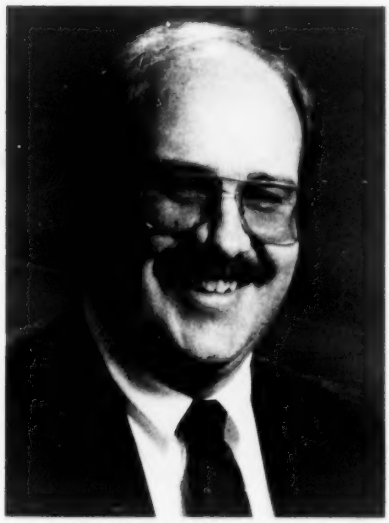
KANSAS AGRICULTURAL STATISTICS INFORMATION FOR 1992

AND PRELIMINARY ESTIMATES FOR 1993



Phillip Fishburn

INTRODUCTION

The Kansas State Board of Agriculture's statistics division, widely known as Kansas Agricultural Statistics, is jointly funded by the state and USDA's National Agricultural Statistics Service. The program of statistical reports ranges from weekly Crop-Weather reports during the March-November growing season to monthly, quarterly, and annual data series, many of which are summarized in this publication.

This publication provides a continuing series of data of critical importance in measuring the success and progress of Kansas agriculture. The current facts and trends shown are essential to our farmers as they make their production and marketing decisions. They are also of utmost importance to agribusiness firms as they work with farmers to improve the overall efficiency of agriculture by better planning to meet the needs of production agriculture in delivering input supplies and in providing viable markets. Reliable data, such as those shown on the pages which follow, are essential to the economic efficiency of the agribusiness segment which is of critical importance to the Kansas economy.

I want to convey my personal thanks to the thousands of Kansas farmers and agribusiness firms who have responded to the many surveys conducted by Kansas Agricultural Statistics. Your response to those surveys is the foundation upon which our data system is based and in responding you have made an important contribution to the Kansas economy.

Phillip Fishburn
Kansas Secretary of Agriculture

KANSAS AGRICULTURAL STATISTICS PROCEDURES AND STAFF

Information is collected in many ways: mail surveys, telephone contacts, personal interviews, and in-the-field observations.

Most estimates are based on probability sample surveys. That is, information collected from a scientifically selected sample of all producers is used to estimate the activities of the entire group. Sampling is not only less costly in time and money than a complete count, but can be more accurate because reporting errors and data-handling errors are minimal compared to those in a complete count or census.

Program content is planned to provide a comparable series of data over time--for example, Kansas wheat and corn production estimates date back to 1866--but also to meet current needs to the extent permitted by available resources. Data user meetings and close contact with farm and industry groups are utilized to maintain the relevance of the data provided.

Kansas Agricultural Statistics staff includes highly trained agricultural statisticians with farm backgrounds and extensive experience in Kansas and other states, a support staff of statistical assistants, computer personnel, and printing-mailing specialists. Eldon J. Thiessen is the Deputy State Statistician. Crop Statisticians include Ronald L. Sitzman, Larry Canicn, Rhonda Brandt, and Dan Kolterman. Livestock Statisticians include Charles L. Ruckman, Betty Johnston, and Kara Ignaszewski. Coen T. Barnes is the Survey Statistician, assisted by Research Analyst Bryan Schmitz and Survey Statistician Lance Honig. Ronald A. Sadler, Systems Analyst, and Melvin E. Perott, Programmer, lead computer activities. Candace S. Thomas and Judy Allison provide editorial assistance. The book was printed in our printing office by Dan Blick and David Judd. In addition, a field and telephone staff of part time enumerators, working under the direction of field supervisors, collect data by personal and telephone interview. The office staff and crew of enumerators join me in thanking the many farmers and agri-business firms who provide the data and assist in planning our program of statistics.

T. J. Byram
State Statistician

The photos for the front of this year's Farm Facts Bulletin were obtained from several sources. Our thanks go to Kevin C. Dhuyvetter, Extension Agricultural Economist, Southwest, from Kansas State University, and our own Sandy Nash (Keyboard Operator), Faith Judd (Telephone Enumerator), and Eldon Thiessen (Deputy State Statistician).

1993 AGRICULTURAL HIGHLIGHTS

by Phillip Fishburn

Flooding was a major concern for Kansas Agriculture in 1993 causing production on nearly five million acres to be reduced or totally lost. Livestock prices were generally above 1992, and farmland values continued their recovery.

Kansas farmers entered the year with continued improvement in their financial condition. Total net farm income was $1.72 billion in 1992, up from the previous record high of $1.66 billion in 1990. Kansas farmers have continued to pay down debt during the last few years. Debt/asset ratios at the end of 1992 dropped from the previous year, and the average value of farm equity increased.

Wheat prices for calendar year 1993 were below previous year levels all year except for December. Sorghum prices moved above year-ago levels in October, while corn prices started their upward swing in August. Soybean prices were comparable to year-earlier levels through June and moved higher for the rest of the year. Hay prices were generally 2 to 5 dollars higher than 1992 levels all year. Cattle prices were above previous-year levels for the first nine months of the year and then started a downward swing for the remainder of the year. Hog prices stayed above 1992 levels all year except for December which was unchanged from last year.

Temperatures averaged below normal for much of the first 6 months of the year, while precipitation was well above normal. This resulted in wheat stands coming out of dormancy well behind normal. Soil moisture during April and May was generally above normal and provided good moisture for planting and germination for summer crops. Heavy rain continued through June and July, causing delays in the wheat harvest and delayed completion of planting summer crops. This resulted in one of the latest harvest completion dates on record. Below normal temperatures and above normal precipitation through much of the summer caused corn and sorghum to progress behind normal early on. By mid- to late summer, however, all summer crops were at or ahead of normal progress. Harvest of the fall crops began behind normal because cool temperatures and precipitation delays. Corn and sorghum harvest lagged behind normal most of the season, but the soybean harvest was completed slightly ahead of normal. Wheat seeding for the 1994 crop proceeded rapidly under mostly good weather conditions from mid-September to mid-October, and by November 28, the wheat was rated 91 percent good to excellent.

Wheat production in Kansas was 388.5 million bushels in 1993, up 7 percent from the 1992 crop but down 18 percent from the 1990 record crop. Yield was estimated at 35.0 bushels per acre, up one bushel from the 1992 yield of 34.0 bushels per acre. The acreage harvested for grain, at 11.1 million acres, was up 4 percent from 1992. Marketing year wheat prices were down the first half of the marketing year but rebounded the last half, producing a value of production of $1.185 billion, up 4 percent from 1992. Kansas regained its status as the number one wheat state in the nation for 1993.

Corn production, at 216.0 million bushels, was down 17 percent from last season. The yield of 120.0 bushels per acre is 30 bushels below the record high of 150.0 bushels realized in 1992. Acreage harvested for grain, at 1.80 million, was up 4 percent from 1992. This was the fourth year

in a row, and only the fourth time since 1976, that corn production exceeded sorghum production. Based on preliminary 1993 marketing year average prices, the value of production for the 1993 corn crop will be $583.2 million, 5 percent above the 1992 value.

Grain sorghum production in Kansas totaled 176.4 million bushels, down 28 percent from 1992. The yield averaged 63.0 bushels per acre, 17 bushels below 1992's record high of 80.0 bushels. Harvested acreage for grain, at 2.80 million acres, was 8 percent below 1992. The preliminary 1993 marketing year average prices indicate a value of production of $423.4 million, 4 percent lower than 1992. Kansas remained behind Texas in sorghum grain production for the second year in a row.

The soybean crop totaled 51.8 million bushels, a decrease of 24 percent from 1992's record high production of 68.45 million bushels. Yield, at 28.0 bushels per acre, was 9 bushels below 1992. The harvested acreage was 1.85 million acres, unchanged from the acreage harvested in 1992. Even though preliminary marketing year prices were above 1992 levels for most of the year, the value of production for the crop was $334.1 million, 10 percent below 1992.

The weather was near ideal for grazing but caused some quality problems for hay production in 1993. The all hay production totaled 6.43 million tons, down 4 percent from 1992, while acres harvested, at 2.45 million acres, was up 2 percent. The all hay marketing year prices were from 2 to 9 dollars above year ago levels all year with the largest increase of $9 occurring in February and March. Grazing and stock water supplies were adequate throughout 1993.

All cattle and calves on Kansas farms and ranches on January 1, 1993 totaled 5.89 million head, up 4 percent from January 1, 1992. Inventories have remained at about this level over the past ten years but have shown an increase for the last two years. The 4.9 million head of cattle marketed during 1993 were down 1 percent from last year and virtually unchanged from two years ago. Fed cattle marketings in 1993 were 4.2 million head, down 5 percent from last year. Beef cattle prices for 1993 were above year ago levels through September but took a downward swing the remainder of the year. Cash receipts from the sale of cattle were $4.37 billion, up 2 percent from 1992.

The 1993 quarterly hog inventories in Kansas were generally below 1992 levels; March was the only quarter above last year. Overall, Kansas hog inventories followed the national trend, but declines in Kansas production were more significant than at the U.S. level. Prices received by farmers for hogs were above 1993 levels all year except for December. Total cash receipts from hogs were $293.5 million, up 8 percent from 1992.

Preliminary indications are that the value of production for Kansas crops will be down, while value of livestock production will be up in 1993. Net farm income for 1993 will most likely be below 1992 levels. The excessive precipitation received during June and July caused extensive crop losses from flooding. Yields in 1993, while near average, were significantly below the 1992 record levels. Pasture and hay production was generally above average, due to the relatively good moisture conditions. Feed costs for livestock producers increased as floods and other weather-related concerns took their toll on the 1993 crops. Government payments will likely be above 1992 levels because of weather-related losses.

KANSAS FARM FACTS

KANSAS' RANK IN U. S. AGRICULTURE, 1993

Crop or Livestock Item	Production or Number	Rank	Kansas Number as % of U.S. Total
Wheat Flour Milled 3/	40,654,000 cwt.	1	10.5
Wheat Flour Milling Capacity, Nov. 1, 1993	130,440 cwt.	1	10.3
All Wheat Produced	388,500,000 bu.	1	16.2
Cattle Slaughtered	6,232,200 head	2	18.7
Sorghum Grain Produced	176,400,000 bu.	2	31.1
Cropland 2/	31,385,090 acres	2	7.1
Prime Farmland 1/	25,237,900 acres	2	7.4
Sorghum Silage Produced	780,000 tons	3	19.9
All Cattle and Calves on Farms, Jan. 1, 1994	5,950,000 head	3	5.8
Red Meat Production by Com'l. Slaughter Plants	4,548,067,000 lbs.	3	11.2
Land in Farms	47,800,000 acres	3	4.9
Cattle and Calves on Grain Feed, Jan. 1, 1994	1,910,000 head	3	14.8
Sunflowers	220,620,000 lbs.	4	8.5
Commercial Grain Storage Capacity, Dec. 1, 1993	836,040,000 bu.	4	9.8
All Other Hay (All Excluding Alfalfa)	3,200,000 tons	5	4.7
Rye Produced	693,000 bu.	5	6.7
Exports of Farm Products, FY 1992	2,198,100,000 dol.	6	5.2
All Hay Produced	6,430,000 tons	6	4.3
Cash Receipts from Farm Marketings, 1992	7,000,307,000 dol.	7	4.1
Beef Cows, Jan. 1, 1994	1,413,000 head	7	4.0
Sheep and Lambs on Feed, Jan. 1, 1994	60,000 head	8	3.3
Corn Grain Produced	216,000,000 bu.	9	3.4
Alfalfa Hay Produced	3,230,000 tons	10T	4.0
Soybeans Produced	51,800,000 bu.	10	2.9
Hogs on Farms, Dec. 1, 1993	1,330,000 head	10	2.3
Dry Edible Beans	378,000 cwt.	11	1.7
All Sheep and Lambs on Farms, Jan. 1, 1994	175,000 head	14	1.9
Corn Silage Produced	1,690,000 tons	15	2.1
Barley Produced	690,000 bu.	22	.2
Oats Produced	1,020,000 bu.	27	.5
Eggs Produced	334,000,000 number	34	.5

1/ Prime farmland is the land best suited to producing food, feed, forage, fiber, and oilseed crops. Soil Conservation Serv., USDA.

BLUESTEM PASTURE

The Bluestem Pasture Report covers the 14 county Flint Hills region (as shown on page 102), which totals approximately 3.9 million acres of pasture and rangelands in Kansas. Seventy-three percent of the acres is under full season contracts, while the remaining 27 percent will be used for intensive grazing. The average beginning date of the 1994 grazing season was April 20 under full season contracts with a reported ending date of October 16. The average reported starting date for intensive grazing was April 22. Pasture burning dates varied considerably. There was substantial early burning this year, both accidental and planned. Eighty-seven percent reported burning pastures, The same as a year ago. The average burning date was April 11. The sources of stock water across the area and the respective frequency of use are: ponds, 57 percent; streams and springs, 35 percent; and wells, 8 percent.

Average lease prices for full season contracts and intensive grazing are included in the tables below. Thirteen percent of the reports indicated contracts based on price per pound of gain, compared to 16 percent in 1993. Prices varied from 11 to 40 cents per pound and averaged 28 cents.

BLUESTEM PASTURE LEASE RATES AND PERCENT LEASED, 1990-1994

1949	137	-	-	1993	65	735	47,800
1950	135	374	50,500				

1/ Beginning with 1975, a farm is defined as any place with annual sales of agricultural products of $1,000 or more. Between 1959 and 1975 a farm was defined as a place of 10 or more acres that had annual sales of agricultural products of $50 or more or a place of less than 10 acres that had annual sales of $250 or more. Prior to 1959 a farm was defined as a place three acres or more in size with a value of farm products amounting to $150 or more. Places of less than three acres with sales of $250 or more were also considered farms.

2/ Land in farms estimates not available on annual basis until 1950.

1990	12,400	11,800	40.0	472,000	2.51	1,184,720,000
1991	11,800	11,000	33.0	363,000	2.81	1,020,030,000
1992	12,000	10,700	34.0	363,800	3.13	1,138,694,000
1993	12,100	11,100	35.0	388,500	3.05	1,184,925,000

1/ Acres planted: record high 1937-17,110,000 acres; record low 1909-6,488,000 acres.
2/ Acres harvested: record high 1947-14,855,000 acres; record low 1866-68,000 acres.
3/ Yield per harvested acre: record high 1983-41.5 bushels; record low 1895-8.0 bushels.
4/ Grain production: record high 1990-472,000,000 bushels; record low 1867-1,112,000 bushels.
5/ Beginning in 1985, price per bushel is marketing year average price which does not include an allowance for loans outstanding and government purchases.

1993.....	2,000	1,930	1,800	120.0	216,000	2.70	583,200,000

1/ Acres planted: record high 1933-7,764,000 acres; record low 1983-1,140,000 acres. Prior to 1926, no records kept on acres planted.
2/ Beginning in 1986, acres harvested for all purposes no longer includes acres harvested as forage.
3/ Acres harvested for grain: record high 1917-9,156,000 acres; record low 1934-172,000 acres.
4/ Yield per acre harvested for grain: record high 1992-150.0 bushels; record low 1913-3.0 bushels per acre.
5/ Grain production: record high 1889-259,824,000 bushels; record low 1934-894,000 bushels.
6/ Beginning in 1985, price per bushel is marketing year average price which does not include an allowance for loans out-standing and government purchases.

CROP STATISTICS 10-75

Apples (commercial): production and value, by districts 75
Barley: acreage, production and value, by districts 74
Corn: all, acres planted and harvested, by counties 36-39
grain, acreage, yield, production and value, by counties 36-39
irrigated and dryland grain production, by counties 40-43
silage; acreage, yield, production and value, by counties 44-47
Dry Beans: acreage, production and value, by counties 75
Hay: Alfalfa; acreage, production and value, by counties 62-65
Other Hay; acreage, production and value, by counties 66-69
All Hay; acreage, production and value, by counties 70-71
Oats: acreage, production and value, by districts 74
Pasture: acres, by counties, 1992 census 72-73
Peaches: production and value, by districts 75
Rye: acreage, production and value, by districts 74
Sorghum: all; acres planted and harvested, by counties 24-27
grain; acreage, production and value, by counties 24-27
irrigated and dryland grain production, by counties 28-31
silage; acreage, production and value, by counties 32-35
Soybeans: acreage, production and value, by counties 48-51
irrigated and dryland production, by counties 52-55
State Summary: Crops - Acreage, yield, production, and value 11
Sunflowers: all; acreage, production, and value 56-57
oil; acreage, production, and value 58-59
non-oil; acreage, production, and value 60-61
Wheat: acreage, production and value, by counties 12-15
continuous cropland 18-19, 22-23
irrigated and summer fallow 16-17, 20-21

LIVESTOCK STATISTICS.....76-102

Cattle: calves born, by county..... 82-85
all cattle and calves, by counties..... 82-85
beef cows, number, by counties..... 82-85
commercial slaughter, by months..... 78
inshipments and outshipments, by district..... 93
inshipments and outshipments, by state of origin..... 92
marketings, other..... 79
milk cows, number, by counties..... 82-85
milk cows and production, by months..... 94
milk cows, production and value, by counties..... 96-97
number and value, by counties..... 82-85
number, by classes..... 77
number of cattle operations..... 77
production, disposition and income..... 79
value of production, by counties..... 90-91
Cattle on feed: classification and weight groups, by quarter..... 80
marketings and placements, by months..... 80
marketings, grain fed..... 79
marketings, by size group..... 79
number, by counties..... 82-85
number of feedlots, by size groups..... 79
Chickens: layers on hand, by months..... 95
number and value, by counties..... 98-99
number on farms..... 95
production and value..... 95
Dairy: milk production and value..... 94
manufactured products..... 94
Eggs: production, by months..... 95
production, disposition, income..... 95
Hatchery production..... 94
Hogs: commercial slaughter, by months..... 78
inshipments and outshipments, by district..... 93
inshipments and outshipments, by state..... 92
number and value, by counties..... 86-89
number, by classes..... 77
number of hog operations..... 77
pig crop, by counties..... 86-89
production, disposition, income..... 81
value of production, by counties..... 90-91
Honey: number of colonies, yield, production, price, and value.....102
Pasture: Bluestem map, value & rental rates, rental acreage guarantees 100-102
Sheep: commercial slaughter, by months..... 78
inshipments and outshipments, by district..... 93
inshipments and outshipments, by state of origin..... 92
number and value, by counties..... 86-89
number, by classes..... 77
number of sheep operations..... 77
production, disposition and income..... 81
value of production, by counties..... 90-91
Red meat production and value..... 78
Turkeys: production and value..... 95
Wool: production and value..... 81

ECONOMIC STATISTICS.....103-106

Farm assets and debts.....106
Farm income.....104
Farm values and rents.....106
Income from farming, cash receipts, gross and net farm income.....104
Production expenses.....105

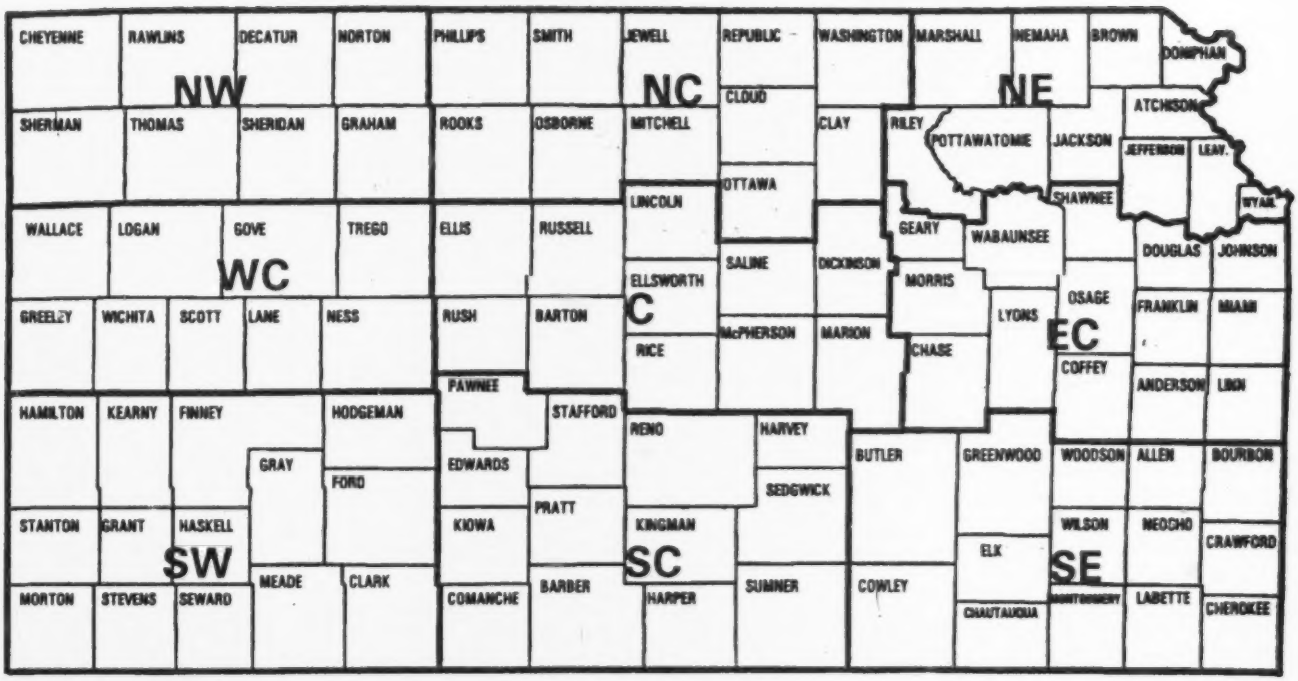
HISTORICAL STATISTICS.....107-113

Historical tables.....108-113
corn, all purposes and grain, 1866-1993.....113
livestock, 1867-1994.....109
number of farms and land in farms, 1880-1993.....108
sorghum, all purposes, grain, 1929-1993.....111
soybeans, 1924-1993.....112
wheat, 1866-1993.....110

Weights and Measures

Bushel weights:
Wheat & soybeans = 60 lbs.
Corn, sorghum & rye = 56 lbs.
Barley (grain) = 48 lbs.: malt = 34 lbs.
Oats = 32 lbs.

AGRICULTURAL STATISTICS DISTRICTS



Kansas is divided into nine Agricultural Statistics districts for convenience in compiling and presenting statistical information on crops and livestock. These nine districts are outlined on the above map. The districts are designated as follows: northwest (NW) (10), west central (WC) (20), southwest (SW) (30), north central (NC) (40), central (C) (50), south central (SC) (60), northeast (NE) (70), east central (EC) (80), and southeast (SE) (90). In tables showing statistical information by counties in this bulletin, counties within each district are grouped together in alphabetical order. Totals and averages are shown for each district.
